PART II: To be completed and signed by a healthcare provider¹. All dates must include month, day, and year. (Check appropriate box)

- Students born before 1957 should see #7 on reverse side.

Measles (Rubeola)

1. Immunization with live virus vaccine?
(Two doses are required and must be given at least 28 days apart. Both doses given in 1968 or later, and given on or after first birthday.)

_____/_____/_____
Date 1 Date 2

2. Disease confirmed by physician's records?

_____/_____/_____
Date of illness Signature of Physician

3. Immunity confirmed by blood titer?

_____/_____/_____
Date of test Attached copy of laboratory Report

4. Exemption?

Attach physician's statement of medical contraindication with duration of medical condition or attach your personal statement of philosophical/religious objection to immunization

Rubella (German Measles)

1. Immunization with live virus vaccine?
(Two doses are required and must be given at least 28 days apart. Both doses given in 1968 or later, and given on or after first birthday.)

_____/_____/_____
Date 1 Date 2

2. Disease confirmed by physician's records?

_____/_____/_____
Date of illness Signature of Physician

3. Immunity confirmed by blood titer?

_____/_____/_____
Date of test Attached copy of laboratory Report

4. Exemption?

Attach physician's statement of medical contraindication with duration of medical condition or attach your personal statement of philosophical/religious objection to immunization

Mumps

1. Immunization with live virus vaccine?
(Two doses are required and must be given at least 28 days apart. Both doses given in 1968 or later, and given on or after first birthday.)

_____/_____/_____
Date 1 Date 2

2. Disease confirmed by physician's records?

_____/_____/_____
Date of illness Signature of Physician

3. Immunity confirmed by acceptable laboratory test?

_____/_____/_____
Date of test Attached copy of laboratory Report

4. Exemption?

Attach physician's statement of medical contraindication with duration of medical condition or attach your personal statement of philosophical/religious objection to immunization

Tetanus and Diphtheria (TD or DT or DPT)

Note: Tetanus Toxoid (TT) is not acceptable.

1. Primary series completed?
(At least three dose are required. One must be within last 10 years)

_____/_____/_____
Date 1 Date 2 Date 3

If serious doubt exists about the completion of a primary three-dose series, two doses of combined (TD) toxoids should be given one month apart, followed by a third dose n 6 months.

2. Exemption?

Attach physician's statement of medical contraindication with duration of medical condition or attach your personal statement of philosophical/religious objection to immunization

Meningitis

1. Primary dose completed?
(Required for students under age of 22. Must be given on or after 16th birthday)

_____/_____/_____
Date 1 Date 2

2. Exemption?

Attach physician's statement of medical contraindication with duration of medical condition or attach your personal statement of philosophical/religious objection to immunization

Health care provider verifying information for Part II.

¹-Physician licensed to practice medicine in all of its branches (MD or DO), a local health authority, registered nurse employed by a school, college, or university, or a department recognized vaccine provider.

INSTRUCTION FOR COMPLETION OF THE ON-CAMPUS HOUSING MEDICAL IMMUNIZATION FORM

Office of the Registrar, MC 018
University of Illinois at Chicago
Suite 2130 Student Services Building
1200 West Harrison St.
Chicago, Illinois 60607

(312) 413-0464
(312) 355-4481 fax
mi@uic.edu

MUST BE COMPLETED AND RETURNED PRIOR TO THE STUDENT'S FIRST ENROLLMENT

NOTE: The Illinois Department of Public Health requires incoming new students living in on-campus housing to document immunity to measles, rubella, mumps, tetanus/diphtheria, and meningitis.

PART I - To be completed by students living in UIC on-campus housing residence halls.

All students who will live in on-campus housing and are admitted or readmitted to the University of Illinois at Chicago must submit this form. A healthcare provider (physician licensed to practice medicine in all of its branches [MD or DO]; a local health authority; registered nurse employed by a school, college, or university; or a department-recognized vaccine provider) must validate current immunization records in PART II. The completed form must be received by the Office of Medical Immunization Records at the University of Illinois at Chicago no later than the first day of classes of the term. Failure to return this form and/or provide proof of immunity to the vaccine-preventable diseases may result in the student not being authorized to register for the next term.

(P.A. 85-1315)

The following are acceptable as documentation of immunization: (1) this form, (2) the Certificate of Child Health Examination form (high school record), and (3) a Certificate of Immunity showing the type of vaccine, date of each dose (month/day/year), the name of the physician or clinic that administered the vaccine, the phone number, and the address. ALL RECORDS must be verified or authenticated by a physician, registered nurse, or public health official and to be date- and dose-specific. Include University Identification Number (UIN) on all documents.

A student with a vaccine exemption may be excluded from the university/college in the event of a measles, rubella, mumps, diphtheria, or meningitis outbreak in accordance with public health recommendations.

All records not in English must be accompanied by a certified translation.

Students should keep a copy of this form for their personal health records. All originals submitted to the Office of Immunization Records will be destroyed after imaging. For additional information, the student may call the Office of Medical Immunization Records at (312) 413-0464. Compliance can be viewed online at the Registrar's web site under "Student Records."

PART II- Must be completed and signed by a healthcare provider.

1. All dates must include MONTH, DAY, and YEAR if it cannot otherwise be determined that the specific vaccine(s) was administered at the minimally acceptable age or dosage interval.
2. All laboratory evidence of immunity must be accompanied by a copy of the laboratory report.
3. All live virus vaccines must have been given on or after the first birthday.
4. The minimum time between each dose of live measles virus vaccine must be at least 28 days.
5. History of rubella disease is not acceptable as proof of immunity.
6. Mumps titer is only acceptable as proof of immunity if the laboratory test used was a neutralization, enzyme-linked immunosorbent assay (ELISA or EIA) or radial hemolysis antibody test. A four-fold rise in antibody titer between appropriately spaced acute and convalescent sera is also acceptable.
7. Individuals born prior to 1957 can be considered immune to measles, mumps, rubella, and polio. Such individuals are also exempt from the state law requiring immunization for tetanus/diphtheria.
8. The following exemptions will be accepted and statements must accompany this record:
 - MEDICAL CONTRAINDICATIONS—A written, signed, and dated statement from a physician stating the specific vaccine or vaccines contraindicated and duration of medical condition that contraindicates the vaccine(s).
 - PHILOSOPHICAL OR RELIGIOUS EXEMPTION—A written, signed, and dated statement by the student (or parent/guardian if the student is a minor) describing his/her objection to immunization.
 - PREGNANCY OR SUSPECTED PREGNANCY—A signed statement from a physician stating the student is pregnant or pregnancy is suspected and an approximate due date.

**KEEP A COPY FOR YOUR RECORDS.
ORIGINALS WILL BE DESTROYED AFTER IMAGING.**
